

21 September 54

MEMORANDUM TO: Colonel White

1. At present, there are only 229 telephone lines on the Agency switchboard available for assignment. Additional lines and facilities cannot be acquired without replacing the present switchboard. This would be costly as well as requiring approximately one year for delivery and installation.

2. To meet this situation, Logistics proposes a survey of Agency lines with the aim of picking up a few lines by the elimination of unessential phones. The proposed memo to major components advises in regard to the tight telephone situation and that a survey will be undertaken, and requests the Chiefs of major components to appoint people to work with the survey team.

3. Recommend signature (5).
